

# Applied Databases Relational Database Tables

HIGHER DIPLOMA IN DATA ANALYTICS

### SQL

- Structured Query Language S.Q.L. "See-Quell"
- Standard Relational Database Language
- SQL is an ANSI/ISO standard, but different databases e.g. MySQL, SQL Server, Oracle may use their own proprietary extensions on top of the standard SQL.

### What can SQL do?

- Create a new database
- Create tables in a database
- Insert data into a database
- Read data from a database
- Update data in a database
- Delete data from a database
- Manage transactions
- Manage concurrency
- Backup and recovery
- Manage users

## SQL vs MySQL

- > SQL is a language.
- MySQL is a database management system.

### Creating a database

CREATE DATABASE <database>;

```
mysql> create database myFirstDatabase;
Query OK, 1 row affected (0.03 sec)
```

```
mysql> CREATE dataBASE MYFirstDATABASE;
Query OK, 1 row affected (0.00 sec)
```

```
mysql> create
   ->
   -> database
   ->
   -> myFirstDatabase
   ->
   ->
   ->
   ->;
Query OK, 1 row affected (0.01 sec)
```

### Using a database

► SHOW DATABASES;

USE <database>;

mysql> use myfirstdatabase; Database changed

## Creating Tables

MySQL Data Types:

https://dev.mysql.com/doc/refman/8.0/en/data-types.html

### Car Attributes

- Makevarchar(20)
- Modelvarchar(20)
- Registration varchar(15)
- Colourvarchar(10)
- Mileage integer
- Engine Size float(2,1)
- Cylinders
- Crankshaft

### Creating Tables

https://dev.mysql.com/doc/refman/8.0/en/creating-tables.html

```
CREATE table  (
<column1> <datatype>,
<column2> <datatype>,
<column3> <datatype>
);
```

```
mysql> CREATE TABLE car (
    -> make VARCHAR(20),
    -> model VARCHAR(20),
    -> registration VARCHAR(15),
    -> colour VARCHAR(10),
    -> milage INTEGER,
    -> engineSize FLOAT(2,1));
Query OK, 0 rows affected (0.15 sec)
```

### Describing Tables

DESCRIBE ;

```
mysql> DESCRIBE car;
  F/ield
                                      Key Default Extra
                               Null
                 varchar(20)
  make
                               YES
                                            NULL
                 varchar(20)
 model
                               YES
                                            NULL
                 varchar(15)
  registration
                               YES
                                            NULL
 colour
                 varchar(10)
                               YES
                                            NULL
                 int(11)
  milage
                               YES
                                            NULL
  engineSize
                 float(2,1)
                               YES
                                            NULL
6 rows in set (0.01 sec)
```

### Creating Tables

#### Person Attributes

- Name
- varchar(20) NOT NULL
- Age
- integer
- Sex
- enum('M','F') default 'M'
- dob
- date
- isStudent
- tinyint(1)

```
mysql> CREATE TABLE person (
    -> name VARCHAR(20) NOT NULL,
    -> age INTEGER,
    -> sex ENUM('M','F') DEFAULT 'M',
    -> dob DATE,
    -> isStudent TINYINT(1));
Query OK, 0 rows affected (0.11 second)
```

### Describing Tables

```
mysql> DESCRIBE person;
                                            Default |
                              Null | Key |
  Field
              Type
               /archar(20)
                              NO
                                            NULL
  name
              int(11)
                                            NULL
  age
                               YES
              enum('M','F')
  sex
                               YES
                                            Μ
              date
  dob
                               YES
                                            NULL
              tinyint(1)
  isStudent/
                               YES
                                            NULL
 rows in set (0.00 sec)
```

## Uniquely Identifying Rows

+ <del> </del>   name	age	sex	+   dob	isStudent
++   John	23	 М	2000-01-01	++   1
Tom	64	М	1958-03-11	0
Mary	12	F	2005-04-11	1
Alan	12	М	2005-11-21	1
Pat	29	M	1993-03-17	0
Shane	40	М	1988-07-21	0
Shane	14	М	2003-06-01	1
Alice	24	F	1999-03-01	1

++		+	+	++

### Uniquely Identifying Rows

```
mysql> DESCRIBE person;
 Field
                                            Default
                              Null
                                                      Extra
              Type
                                     Key
              varchar(20)
                              NO
                                            NULL
 name
              int(11)
                                            NULL
                              YES
 age
              enum('M','F')
                              YES
                                            Μ
 sex
 dob
              date
                              YES
                                            NULL
 isStudent
              tinyint(1)
                              YES
                                            NULL
 rows in set (0.00 sec)
```

### Primary Key

- The PRIMARY KEY constraint uniquely identifies each record in a table.
- Primary keys must contain UNIQUE values, and cannot contain NULL values.
- A table can have only one primary key, which may consist of single or multiple fields.

### Person Attributes

- PersonID
  - integer auto\_increment
- Name
- varchar(20) NOT NULL
- Age
- integer
- Sex
- enum('M','F') default 'M'
- dob
- date
- isStudent
- tinyint(1)

```
mysql> CREATE TABLE person (
    -> personID INTEGER AUTO_INCREMENT,
    -> name VARCHAR(20) NOT NULL,
    -> age INTEGER,
    -> sex ENUM('M','F') DEFAULT 'M',
    -> dob DATE,
    -> isStudent TINYINT(1),
    -> PRIMARY KEY(personID));
Query OK, 0 rows affected (0.17 sec)
```

personID	name	age	sex	dob	isStudent		
1	   John	   23	+   м	+   2000-01-01	   1		
2	Tom	64	М	1958-03-11	9		
3	Mary	12	F	2005-04-11	1		
4	Alan	12	M	2005-11-21	1

7	Shane	14	M	2003-06-01	1		
8	Alice	24	F	1999-03-01	1		
9	Pat	37	F	1988-04-15	0		
+							
rows in set (0.00 sec)							

### Uniquely identifying rows

DESCRIBE ;

```
mysql> DESCRIBE car;
                               Null | Key | Default | Extra
 Field
                 Type
                 varchar(20)
                                YES
                                             NULL
 make
 model
                 varchar(20)
                                YES
                                             NULL
                 varchar(15)
 registration
                                YES
                                             NULL
 colour
                 varchar(10)
                                YES
                                             NULL
 milage
                 int(11)
                                YES
                                             NULL
 engineSize
                 float(2,1)
                                YES
                                             NULL
6 rows in set (0.01 sec)
```

191-G-201

191-G-201

```
mysql> CREATE TABLE car (
    -> registration VARCHAR(15),
    -> make VARCHAR(20),
    -> model VARCHAR(20),
    -> colour VARCHAR(10),
    -> milage INTEGER,
    -> engineSize FLOAT(2,1),
    -> PRIMARY KEY(registration);
Query OK, 0 rows affected (0.14 sec)
```

### Getting information from a table

► SELECT <a href="https://dev.mysql.com/doc/refman/8.0/en/select.html">https://dev.mysql.com/doc/refman/8.0/en/select.html</a>

```
SELECT <columns>
FROM ;
```

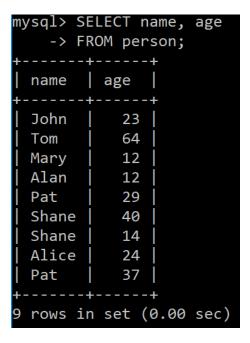

### SELECT

### mysql> SELECT \* FROM person;

personID	name	age	sex	dob	isStudent
1	John	23	M	2000-01-01	1
2	Tom	64	М	1958-03-11	0
3	Mary	12	F	2005-04-11	1
4	Alan	12	М	2005-11-21	1
5	Pat	29	М	1993-03-17	0

           Pat
                     37
                                 1988-04-15
rows in set (0.00 sec)
```

The IN operator allows you to determine if a specified value matches any value in a set of values, or returned by a subquery.

personID	name	age	sex	dob	isStudent
1	John	23	М	2000-01-01	1
2	Tom	64	M	1958-03-11	0
3	Mary	12	F	2005-04-11	1
4	Alan	12	M	2005-11-21	1
5	Pat	29	M	1993-03-17	0
6	Shane	40	M	1988-07-21	0
7	Shane	14	M	2003-06-01	1
8	Alice	24	F	1999-03-01	1
9	Pat	37	F	1988-04-15	0

### Combining AND, OR operators

personID	name	age	sex	dob	isStudent		
1	John	23	   м	   2000-01-01			
2	Tom	64	М	1958-03-11	0		
3	Mary	12	F	2005-04-11	1		
4	Alan	12	М	2005-11-21	1		
5	Pat	29	М	1993-03-17	0		
6	Shane	40	M	1988-07-21	0		
7	Shane	14	M	2003-06-01	1		
8	Alice	24	F	1999-03-01	1		
9	Pat	37	F	1988-04-15	0		
erows in set (0.00 sec)							

```
mysql> SELECT name, age
-> FROM person
-> WHERE sex="M"
-> AND name LIKE "S%
-> OR name LIKE "A%"

+----+
| name | age |
+----+
| Alan | 12 |
| Shane | 40 |
| Shane | 14 |
| Alice | 24 |
+----+
4 rows in set (0.00 sec)
```

https://dev.mysql.com/doc/refman/8.0/en/operator-precedence.html

The LIMIT clause can be used to constrain the number of rows returned by the SELECT statement

```
personID
                                    dob
                                                 isStudent
             name
                     age
